Office Action Summary	Application No. 10/701,098	Applicant(s) LOEGER ET AL.	
	Examiner Lalita M. Hamilton	Art Unit 3691	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Request for Continued Examination (RCE)

On September 18, 2008, the Board affirmed the Examiner's rejections of claims 1-29. The RCE filed on November 18, 2008 has been processed. A non-final follows.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 30-53 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 30-47 recite a process. Based on Supreme Court precedent, a proper process must be tied to another statutory class or transform underlying subject matter to a different state or thing (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)). Since neither of these requirements is met by the claim, the method is not considered a patent eligible process under 35 U.S.C. 101. To qualify as a statutory process, the claim should positively recite the other statutory class to which it is tied, for example by identifying the apparatus that accomplished the method steps or positively reciting the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Claims 48-53 are directed to a system. The system claims must include hardware limitations to be considered statutory.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 30-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Todd (2003/0061093) in view of Broe (2005/0055270) and Gallagher (2002/0046110).

Todd discloses the invention substantially as claimed (para.15-22, 60-62, 66-82, and 85-86). Todd does not disclose allowing the user to redeem a portion of the dollar value through an electronic deposit into a bank account, selecting the option, and transferring the funds into the account or at least one other option selected from the group consisting of: an option to redeem at least a portion of the dollar-value balance through a merchant certificate, an option to redeem at least a portion of the dollar-value balance through a credit to the transaction account, and an option to redeem at least a portion of the dollar-value balance through a charitable gift, receiving, via the web interface, a selection by the consumer of the option to redeem at least a portion of the

dollar-value balance through an electronic deposit to a bank account. Gallagher teaches administering an incentive award program comprising allowing the user to redeem a portion of the dollar value through an electronic deposit into a bank account, selecting the option, and transferring the funds into the account (para. 10, 58, and 65). Broe teaches a reward program comprising at least one other option selected from the group consisting of: an option to redeem at least a portion of the dollar-value balance through a merchant certificate, an option to redeem at least a portion of the dollar-value balance through a credit to the transaction account, and an option to redeem at least a portion of the dollar-value balance through a charitable gift, receiving, via the web interface, a selection by the consumer of the option to redeem at least a portion of the dollar-value balance through an electronic deposit to a bank account (para. 38, 46-50, and 67-69). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Gallagher and Broe within Todd for the motivation of allowing a user to choose alternative reward redemptions.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lalita M. Hamilton whose telephone number is (571) 272-6743. The examiner can normally be reached on Tuesday-Thursday (6:30-2:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kalinowski Alexander can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
